

**NEW!**

**ZERO-TURN BAGGING COLLECTION SYSTEM FOR**

**Yard Shark™**

**Zero Turn Commercial Mowers**

12-bushel triple bag collection system (manual off-load)

12-bushel dedicated dumping system

This innovative trailer collector system attaches quickly and easily via two spring-loaded pins and does not interfere with the mower's normal operation. Swivel

wheels on the trailer enable the machine to continue to operate as a true zero turn mower with the collection system attached. Since the trailer wheels carry the

grass load, stability is actually enhanced – there is no need for front weights. The trailer releases quickly via dual spring-loaded latches – no tools required!

**FEATURES INCLUDE:**

The spring-loaded quick hitch feature allows easy mounting/dismount of the trailer. Simply pull the levers and the hitch bracket snaps on to the machine pins. Release is just as easy.

The 16-inch vertical turbo blower delivers high suction and blowing capacity. Once the unit is initially installed on the machine, it can be conveniently and quickly removed or installed by simply loosening two bolts and sliding it off the machine. The hose is quickly and easily attached or removed with spring loaded hose clips.

Our three bag collection system offers large 12 bushel capacity and features high quality polyester fabric bags formed plastic bottoms, tapered sides and built-in handles for easy dumping. The bags slide in and out of the framework easily. Gas springs hold the top cover open wide and the top cover has a lock pin for trailering or for operating on rough terrain.

**NEW!**

**ZERO-TURN BAGGING COLLECTION SYSTEM FOR**

**Yard Shark™**

**Zero Turn Commercial Mowers**

Conversion accessory converts the triple bag manual collector to a 9-bushel release from seat system.

**Unload From**

**Seat Conversion Attachment**

This accessory converts the three-bag manual system to a dedicated electrically-operated release unit.

The operator simply pushes a button to discharge collected grass and leaves from the seated position.

**9-BUSHEL ELECTRONIC RELEASE**

- ✓ Nine bushel capacity
- ✓ Easily converts back to the three-bag 12 bushel collector, since both models use the same frame.
- ✓ Top cover has lock pin for trailering or operating in rough terrain.
- ✓ Gas springs hold the top cover wide open or closed.

FOR 51" AND 60" DECK MODELS..... No. YCD9

**12-BUSHEL ELECTRONIC RELEASE**

- ✓ Dedicated unload from seat model.
- ✓ Electronically-operated, push-button discharge from the seated operator position.
- ✓ Gas springs hold the top cover open wide or closed.
- ✓ Top cover has lock pin for trailering or operating in rough terrain.
